Manufacturing Infrastructure and Turnover

- The infrastructure owned by VYARA group includes lands over 1,00,000 m²
- Built up covered spaces in excess of 15,000m²
- Manufacturing capacity of over 1,50,000 m² p.m.

German Block Machines REKERS & MASA

Infrastructure includes several other Columbia Machines, Vacuum Wet Presses from England, several Batching and mixing plants, Shot Blasting machines, Linear Grinding machines, Automatic in-line spray coating lines, Silos, In house workshops, and a bevy of fine equipment for production of even finer paving materials.

FOREST Wet Presses for Kerbs & Flags from England

VYARA possesses multiple Wet presses for the production of a wide range of Kerbstones, Flagstones and accessories for most details that are required by Urban planning and Landscape designers.

The VYARA Infrastructure- Curing of blocks

Curing of blocks take place in controlled conditions in enclosed chambers

This translates into sharpest and brightest efflorescence free colours

Consistent finish and strength of materials

Plant for FreeForm Architectural Premixes

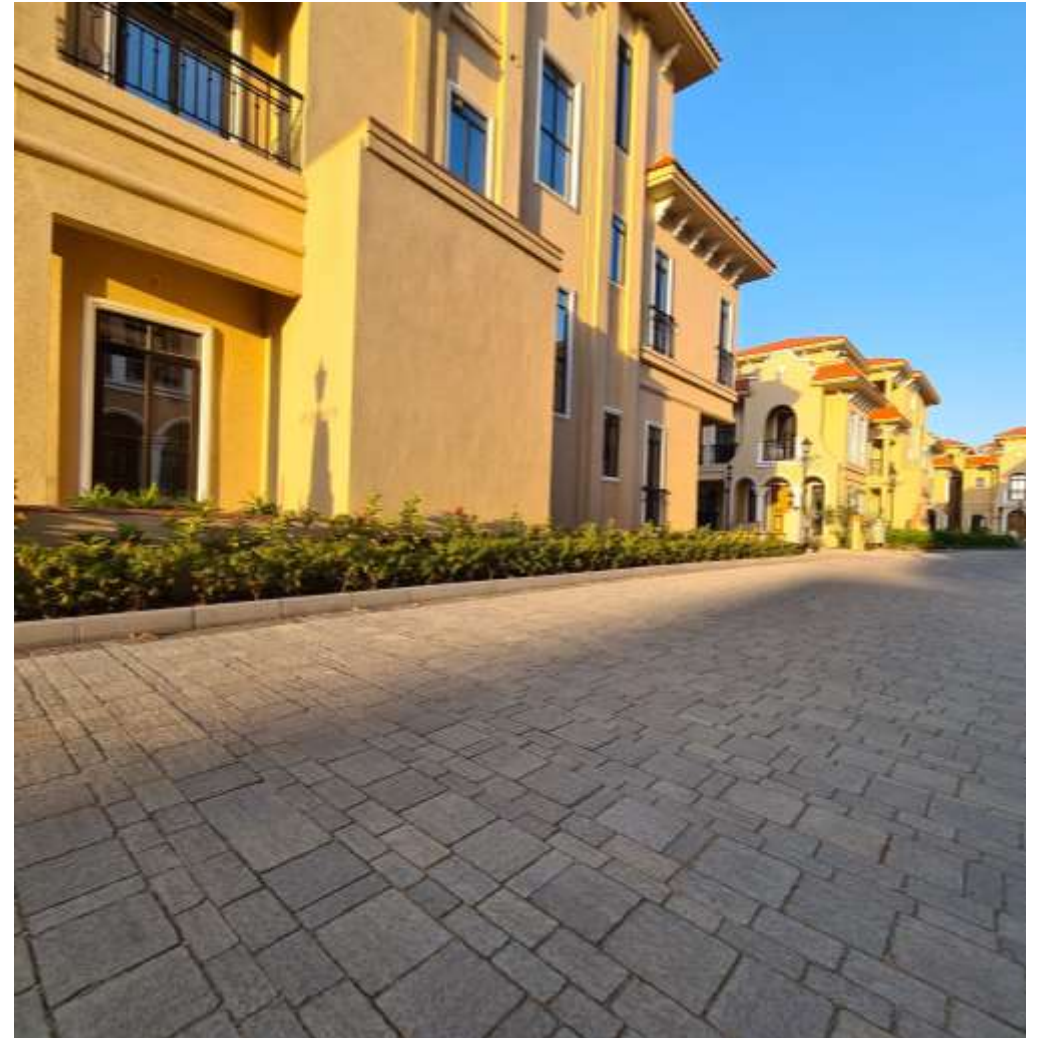

Plant for FreeForm architectural Premixes includes an in-house stone crusher with vibrating screens, Dry Mix plant with planetary mixers, a paint mixing line, and automatic packaging plant and an extensive in-house lab
